

Here are the numbers you requested regarding students who come to Connections for the Junior and/or Senior year and take advantage of the allotment to pay for college classes. I've broken the numbers down three different ways to try to help make them more accessible. This data should be very close to accurate. There may be a few inaccuracies because the database was not set up with this sort of search in mind. This was a combination of a couple different searches and I am confident that any inaccuracy is minimal.

Here are the numbers sorted by year in school. Not surprisingly most students taking advantage of this opportunity are juniors or seniors. We do have the occasional sophomore, or even freshman, take KPC classes.

Notice the blip in 2014-15. Most of that is attributable to students coming to Connections from Skyview, rather than going to SOHI in the reconfiguration year.
