

KENAI PENINSULA BOROUGH SCHOOL DISTRICT

The Kenai Peninsula Borough School District Career and Technical Education Staff are committed to providing ongoing and current courses and curriculum to assist our students in planning for their futures. We currently have eight Pathways: Business and Information Systems, Construction, Architecture and Drafting, Engineering, Health Science, Hospitality and Tourism, Human Services, Natural Resources, and Transportation.

In the KPBSD Career and Technical Pathways there is an overall emphasis on developing workplace skills and academic rigor that enables our students to become better qualified to compete for a career of their choosing. Our career courses allow students to discover talents, skills, and abilities and then chart an appropriate path toward career choices in order to produce a more informed, satisfied, and productive workforce.

The following career-ready practices describe the career-ready skills that all KPBSD CTE educators seek to develop in their students. These practices are not exclusive to a specific career pathway, program of study, or discipline. These skills will be taught and reinforced in ALL career technical education courses with higher levels of complexity and expectation as a student advances through their program of study.

- Act as a responsible and contributing citizen and employee.
- Apply appropriate academic and technical skills.
- Utilize critical thinking to make sense of problems and persevere in solving them.
- Work productively in teams while using cultural/global competence.

Career and Technical Education prepares students for career pathways in the global marketplace by offering experiential learning, post-secondary credits, and industry certifications. Student will gain technical and high-level academic skills, equipping them to be lifelong learners, productive, responsible citizens who are prepared to be successful in a dynamic world.
