

Notes:

2017: was first year of PEAKS and was 3-10

2018: Text Dependent Analysis was added (really was about writing ability) but technology issues prevented scores from being reliable.

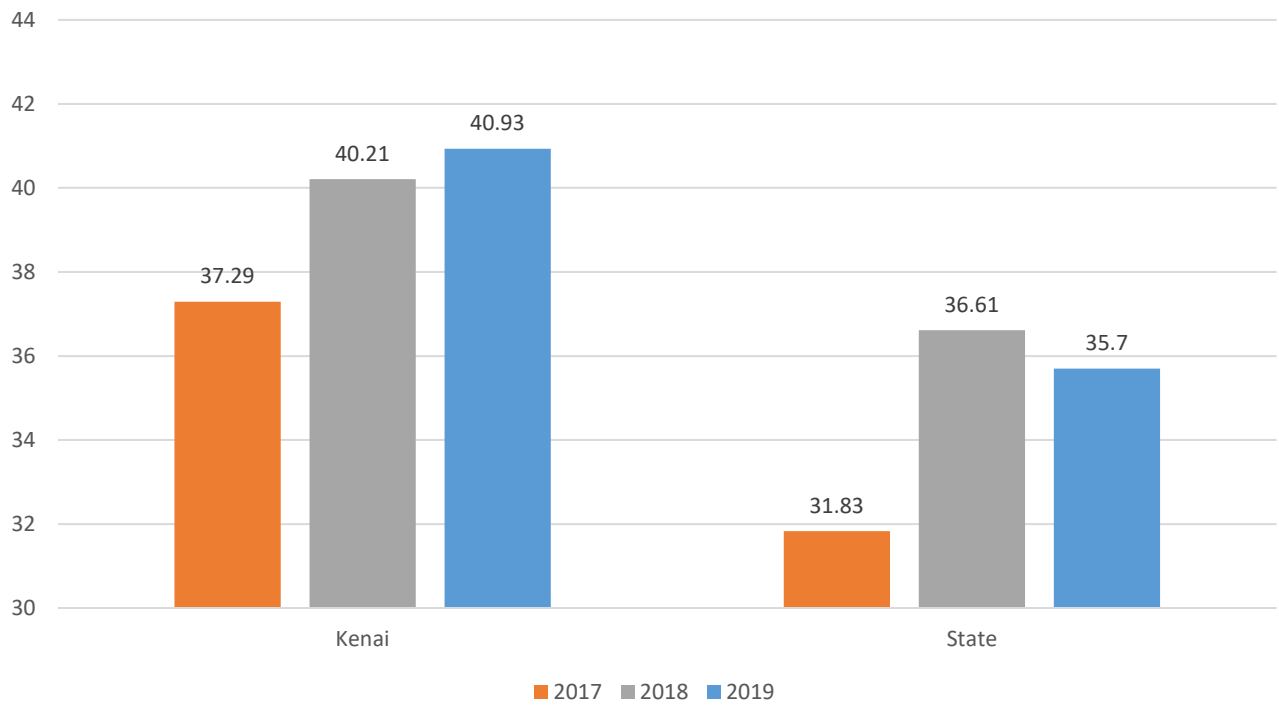

2018: 10th graders weren't tested (in 2017 ELA only 39.1% and math 17.1% were proficient)

2019: Text Dependent Analysis is counted

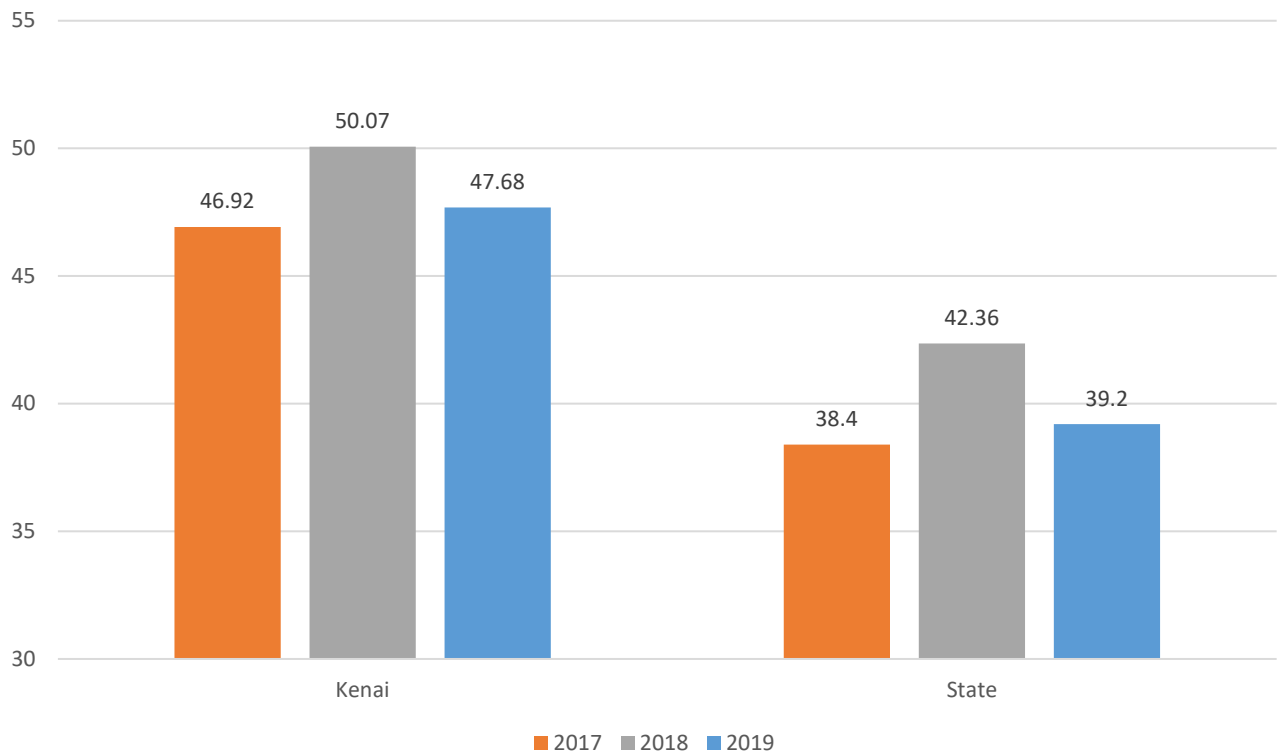

2019: 7th and 8th grade math is adjusted to better align with state standards

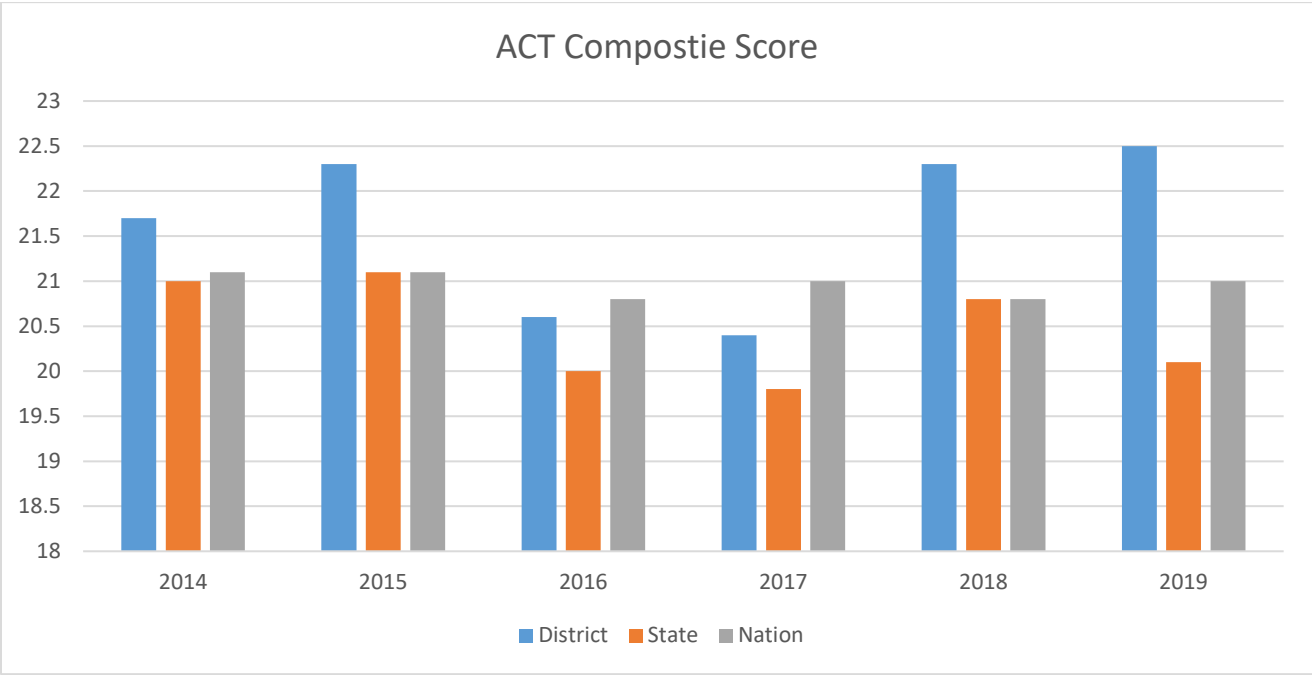

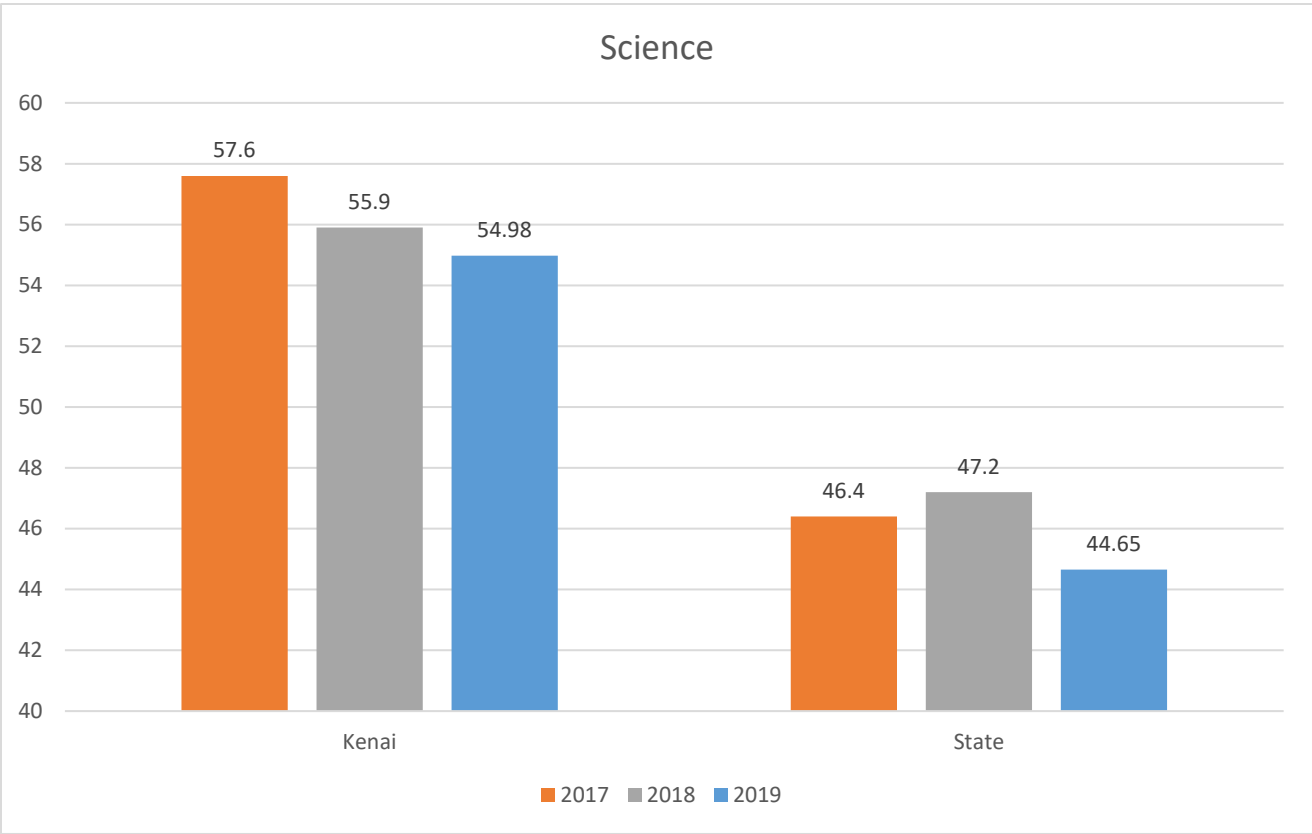

2019: 9th grade math is algebra only
