Family and Community Engagement

If you could create one school goal that would impact this goal, what would this goal be?

KPBSD certified staff will engage with parents on a regular basis. (utilize volunteers, invite parents to participate in class activities and celebrations, have open two-way communication with families, etc.)

Is this a goal you are currently working on in your building?

Indirectly. This could morph into another strand from the parent volunteer aspect of engagement.

Please share your school goal.

Initially, to increase the pool of parent volunteers in the school to get more parents into the schools.

What metrics are you using to measure your goal?

N/A

Which area is your biggest concern for 2022-2027?

I do not know that it is my biggest concern, but having public advocacy for public schools should be a priority.

Do you have additional information you would like to share?

Do you have specific data you would like to have access to in order to assist with supporting the Domains in your building to be better informed as we move forward with the development with the KPBSD Strategic Plan?

Do you have clarifying questions?

Email your response to Kari Dendurent.

Family and Community Engagement

If you could create one school goal that would impact this goal, what would this goal be?

KPBSD will streamline the process for parents and community members to volunteer in schools and school activities.

Is this a goal you are currently working on in your building?

Increasing the pool of parent volunteers in an ongoing goal.

Please share your school goal.

To increase the pool of parent volunteers in the school

What metrics are you using to measure your goal?

I am not currently measuring these goals, but that could easily be done by setting percentage targets based on the population of parents.

Which area is your biggest concern for 2022-2027?

I do not know that it is my biggest concern, but having public advocacy for public schools should be a priority.

Do you have additional information you would like to share?

Do you have specific data you would like to have access to in order to assist with supporting the Domains in your building to be better informed as we move forward with the development with the KPBSD Strategic Plan?

Do you have clarifying questions?

For the draft mission statement, please use language that the general public will understand. I believe the word "agency" will be lost by many people.

Organizational and Resource Management

If you could create one school goal that would impact this goal, what would this goal be?

*Area: Family and Community Engagement

- To create opportunities for our family and community to participate in decisions about the school.

Is this a goal you are currently working on in your building? Please share your school goal. What metrics are you using to measure your goal?

- Currently not working on it, but have in the past and is part of our current APC strategic plan.

Which area is your biggest concern for 2022-2027?

- Not related to this goal specifically is focusing on accelerating learning for students.

Do you have additional information you would like to share?

- n/a

Do you have specific data you would like to have access to in order to assist with supporting the Domains in your building to be better informed as we move forward with the development with the KPBSD Strategic Plan?

- I think collaborating with other administrators to build a bigger variety of options to choose from when planning these events.

Do you have clarifying questions?

- Not at this time. 😊

Organizational and Resource Management

If you could create one school goal that would impact this goal, what would this goal be?

Develop partnerships within the community that allow students to extend their learning and connect it to application in the community through service learning projects, or gaining access to local expertise both within the classroom and outside participation.

Is this a goal you are currently working on in your building? Please share your school goal. What metrics are you using to measure your goal?

Initial Response to Questions: We have a related goal of encouraging participation of parents in having students share learning from service projects while having parents participate in the service project. Measurement is number of participants in the service learning project night.

Kari's Verbal Direction Response:

Goal to increase student engagements in service learning projects by 50 percent by ????. Measured by establishing baseline of current engagements and then tracking number of added engagements over time.

Goal to increase (by how much?? Need data and discussion on reasonable growth) parent participation in service learning projects and community partnership either through participation with child, or providing expertise within the school or in learning opportunities for students at their work location. Measurement would include baseline data on parent participation & parent leadership engagements. Establish criteria for participation and track. Establish criteria for parent leadership/host partnerships and track number of engagements with school.

Which area is your biggest concern for 2022-2027?

For the goal area: Commitment to service learning across the district. Capacity of communities to support the effort to have schools engage in the community. Structures and leadership for successful growth for this type of learning for students.

In General: Lack of Funding, Loss of teaching expertise due to retirements... so recruitment of excellent instructors with capacity to extend learning beyond class/book.

Do you have additional information you would like to share?

For the goal area: Engagement in the community is, in my opinion, the most successful way of building support for education, and provides a critical buy-in point for students in their learning. The more students are engaged with all facets of our community, the more opportunities and experience they have to establish success points and schema for their future.

In General (Unrelated): Would like to see consideration for handling special services for charter schools in a different way so that support for special services students in charter schools can be more nimble as students enter or leave a charter program.

Do you have specific data you would like to have access to in order to assist with supporting the Domains in your building to be better informed as we move forward with the development with the KPBSD Strategic Plan?

I feel student success and climate have good, accessible data for staff. I think data on community resources and willing partners for connecting schools to businesses/organizations would help staff extend learning beyond the walls and beyond the book. At this time, that sort of data and information does not exist in any useable format for teachers to know what opportunities exist. Also, data for how community partnership learning and service learning projects can influence student engagement and student academic success would be good to develop and share, and then extend this to relationship and data to student success, engagement, and learning.

Do you have clarifying questions?

No.

* **Family and Community Engagement**

If you could create one school goal that would impact this goal, what would this goal be? There is a need to continue to make sure the trust/ relationship we build this year stays intact for parents to continue to value Tebughna School. Family involvement really empowers our students to take accountability in their education.

Is this a goal you are currently working on in your building? Please share your school goal. What metrics are you using to measure your goal? Yes, we have this defined in our Title 1 School Policy document, and our strong partnership within the village tribal leadership, Project GRAD, Tyonek Native Corporation, and other non- profits to build some amazing events, and provide professional development has supported this goal. Metrics we use are collecting data of parent attendance, and documenting feedback on our social media.

Which area is your biggest concern for 2022-2027? Maintaining student success to proficiency in reading and math. Likewise, the need to seek out more professional development to provide support for teachers to value having data conversations, and following through with implementation.

Do you have additional information you would like to share? Not at the moment.

Do you have specific data you would like to have access to in order to assist with supporting the Domains in your building to be better informed as we move forward with the development with the KPBSD Strategic Plan? I would like to have more training in how to find specific reporting in Admin. Powerschool.

Do you have clarifying questions? Not at the moment.
