

The KPBSD District Instructional Team met, discussed and determined to streamline and reduce the number of surveys given to students. Thus, the KPBSD Health and Wellness questions were added to the Hanover School Climate and Mindset survey that was distributed in March 2022. It was hopeful this decision assisted in avoiding on-line survey fatigue and to ensure better data.

In addition, with the number of surveys given to teachers, administrators, and parents this year, it was determined to wait until next year to give staff and parents the survey and to assess the results of that survey and the Hanover survey. Date for parent and staff survey is tentatively set for October to include parent teacher conference time in an effort to capture as many parents we can for this survey.

In an effort to ensure the KPBSD has stakeholder data for the 2021-22 school year, DIT chose to use the ESSER III survey provided to stakeholders to determine how funding should be spent. Options included healthy lifestyle options, social emotional learning options, and mental health options. See results below.

ESSER III Survey

ANSWER CHOICES	RESPONSES	
After School Programs	35.73%	467
Academic Intervention Programs	26.93%	352
Breakfast and Lunch Programs	28.00%	366
Career and Technical Programs	25.86%	338
Credit Recovery Options	7.65%	100
