Last Revised	July 9, 2012

The School Board intends that district instructional materials present a broad spectrum of knowledge and viewpoints, reflect the ethnic and cultural diversity of our society, and enhance the use of multiple teaching strategies and technologies. The Board's adoption of instructional materials shall be based on a determination that such materials meet criteria specified in law and are an effective learning resource to help students achieve grade-level competency.

The Superintendent or designee shall establish procedures by which new instructional materials may be requested and subsequently evaluated, together with existing materials. The review of instructional materials shall be coordinated with the overall development and evaluation of the District's curriculum. Teachers, students, parents/guardians and community members shall have the opportunity to recommend instructional materials.

The Superintendent or designee shall establish instructional material evaluation committees. These committees shall include teachers, administrators and other staff who have subject-matter expertise, and may include parents/guardians and/or community members.

Individuals who participate in selecting instructional materials shall have no financial interest in the materials being reviewed, recommended, or approved.

The district may pilot instructional materials using a representative sample of classrooms for a specified period of time during a school year in order to determine how well the materials support the district's curricular goals and academic standards. Feedback from teachers piloting the materials shall be made available to the Board before the materials are adopted. All recommended core instructional materials shall be made available for public inspection upon request at the district office.

Recommendations for the adoption and/or withdrawal of instructional materials may be reviewed with the Board by the Superintendent and shall include documentation supporting the recommendation.
