

KPBSD Policy Manual

E 3543

Sign and return to Operations and Business Management by October 31.

SCHOOL BUS SAFETY INSTRUCTION FORM

By state regulation, each school district is to “provide instruction on safe boarding, riding, exiting and emergency procedures to school children transported to or from a public school by school bus.” Whether it is home-school transportation or an activity trip, virtually the entire district student population travels on a school bus sometime throughout the school year. It is because of the students’ use of this transportation that KPBSD shall provide safety instruction to all students.

School bus safety videos are available in your school’s office or at the Districtwide Media Center. Please use these videos as tools for teaching school bus safety.

School Bus Safety Week is observed in October; safety instruction should be focused on during that month. Upon completion of safety training, sign the following statement and return this form to the Operations and Business Management office.

I verify that the students at _____ School have received instruction in safe boarding, riding, exiting and emergency procedures of school bus transportation.
